

# Self Made Billionaire Project

WhitePaper V 1.0

# Introduction

The SMB Project is a fully decentralized community founded on the principle that we can help the people and the planet alike. The SMB Project consists of 3 tokens, a forum, and a coin index.

The "Self Made Billionaire-SMB Token" is the backbone of the SMB ecosystem and will help pave the way for future SMB development and projects which include, but are not limited to, the SMB Crypto Forum, SMB Coin Index, and other coins/ tokens.

The "Self Made Billionaire Green Earth-SMBGE Token" will focus on agricultural and green projects.

The "Self Made Billionaire Elon-SMBElon Token" is the SMB Token project's meme token, named after one of the world's finest Self Made Billionaires, and is tied into the SMB Reward system.

The SMB Crypto Forum is designed for people to communicate about crypto, advertise projects, and earn SMB token rewards in the process.

The SMB Coin Index is a place to list your own crypto projects.

I was inspired to start the Self Made Billionaire project after witnessing a 70 year-old man forced to work because his retirement did not cover all of his bills. I thought to myself, "This won't be me, and this is not right." The elderly should be able to enjoy the last years of their life, and we should all be able to spend more time with our families than we do in the workplace.

Once we complete our mission to a fully decentralized community, we will have successfully demonstrated to the world how a decentralized approach is just as effective -- if not more so -- than a centralized one. Along the way, we will have improved the quality of life of thousands (if not millions) of people.

# Why Decentralizing Matters?

Unlike governments and corporate entities, community members have a better understanding of the unique problems facing their respective communities. Community members have better ideas on where to focus energy, spend money, and how to organize more efficiently. In a decentralized community, active community members directly participate in the decision-making and are the drivers of change and innovation.

**Decentralization has three general benefits:**

1. It encourages motivational thought and creativity
2. It allows many minds to work simultaneously on the same issue.
3. It accommodates flexibility and individualization through innovation and successful implementation of new ideas.

## Why so many tokens?

SMB offers diverse investment opportunities for our clients through multiple tokens, each with different functions and purposes. If you want to help grow the SMB project as a whole, invest in the Self Made Billionaire-SMBToken. Investors with a green thumb will be interested in supporting the Self Made Billionaire Green Earth-SMBGE Token, contributing to agricultural and green projects. Finally, if you want to HODL millions, billions or even trillions of tokens and go on a mission, hop onto the Self Made Billionaire-SMBElon Token for meme ride to the moon.

# Why Should I Care?

The Self Made Billionaire project aims to create an impressive size community of like-minded people who work together in a decentralized manner to improve the lives of many. We have grown our community from a few people to a few thousand people in just a few short months. The project started with \$0 and a vision, and as the vision unfolds and our goals consistently met, SMBElon now has a Diluted Market Cap of \$47,367.28, SMBGE has a Diluted Market Cap of \$12,031.46 and SMB has a Diluted Market Cap: \$18,967.49. With the SMB project we have a chance to make history, and you have an opportunity to make change!

All investments come with risks, and we do not promise gains. However, investing in SMB assets is potentially extremely profitable, and is for a good cause.

We have started out all of our assets at the lowest possible price to maximize the upside potential and minimize the risk for early investors. Invest in SMB assets if you want to gain direct exposure to the demand for our digital currencies and you believe in our cause!

For people who have little to no money to invest, we offer innovative distribution methods for our assets, such as rewarding members in our crypto forum for usage, daily airdrops in our Discord server, daily tasks, referrals, contests and giveaways!

Additionally, we are currently partnered with Corgiswap and YieldFields in the creation of farms and pools for our investors, offering excellent APR opportunities. And we are actively seeking out new partnerships that share the views and goals of the SMB project to ensure our continuous growth.

## High Risk Investment

Trading cryptocurrencies carries a high level of risk, and may not be suitable for all investors. Before deciding to trade cryptocurrency you should be aware of all laws in your area regarding cryptocurrency, you should carefully consider your investment objectives, level of experience, and risk appetite. The possibility exists that you could sustain a loss of some or all of your initial investment and therefore you should not invest money that you cannot afford to lose. You should be aware of all the risks associated with cryptocurrency trading, and seek advice from an independent financial advisor and conduct your own research and due diligence. If you do purchase any SMB assets, you understand and agree that you are not purchasing shares or securities of any type.
